

Marie McClelland

Math and Religion

Dear Parents and Guardians,

My name is Marie McClelland and I am extremely excited about beginning a new school year. This is my fifth year at St. Anne, but my twenty-second year as a math teacher. I am a native of Beaumont, a St. Anthony and Kelly High School alumni and a graduate of Lamar University. I have a daughter who is currently attending Kelly High School. I very excited about getting to know your child and helping them achieve their goals.

In mathematics for their fifth grade year, students will be reviewing and building upon the concepts of place value, operations of addition, multiplication and subtraction. Students will also be utilizing their skills in division and fractions. Accelerated Math will reinforce concepts already known to your child and allow them to work at their own pace with new concepts that are introduced in this program. In Religion, we will discuss all of the sacraments and how they play a role in our lives as Christians and Catholics. Service projects will also be done throughout the year to help your child gain the value of community service.

Additional information about the class is provided in the parent letter on our webpage. Please read this as well as our classroom rules so that you are aware of our expectations for your child.

Your child's experience at our school is our most important concern. If you need to speak with me, please do not hesitate to contact the school at 409-832-5939 and I will call you at my next available conference period. You may also email during the day, but I may not be able to respond until the end of the school day.

I am excited about working with your child. I welcome questions or comments, and am looking forward to a great year!
